Additional Information

Type of Project Facilities
Category Carryover Project (Received previous appropriations)
Justification This project reflects funding for deficiencies identified as part of the City Facilities Condition Assessment. The funding is assigned in increments spanning multiple years. Work includes, but is not limited to, repainting the exterior of the buildings, replacing flooring, replacing sealants at the perimeter of the windows, bathroom repairs, and repairing asphalt outside the buildings.
General Plan Element Goal(s) LU-3 Achieve a strong, positive community aesthetic.;
 CS-1 Minimize the risks to public health, safety, and welfare resulting from natural and human-caused hazards.

City Council Chambers Renovations - Feasibility

Project Number: BL24010
Total Budgeted Capital Costs: \$194,975.00
Total Budgeted Funding Sources: \$194,975.00

Department: Bldg & Grounds Maintenance
Type: Facilities and Parks

Request description:

Feasibility study and evaluation of alternatives for renovation of City Council Chambers in City Hall.

Capital Costs	Historical Budgeted	FY2027	FY2028	FY2029	FY2030	FY2031	Total Budgeted
Planning/Design	\$144,975.00	\$50,000.00	\$0.00	\$0.00	\$0.00	\$0.00	\$194,975.00

Additional Information

Type of Project: Facilities
 Category: New Project (Funding identified, not yet appropriated)
 Justification: The existing elevator adjacent to City Council Chambers has reached the end of its useful life and needs to be replaced.
 General Plan Element Goal(s): CS-1 Minimize the risks to public health, safety, and welfare resulting from natural and human-caused hazards.

Police Facility Flooring Replacement

Project Number: BL24011
Total Budgeted Capital Costs: \$249,078.00
Total Budgeted Funding Sources: \$249,078.00

Department: Bldg & Grounds Maintenance
Type: Facilities and Parks

Request description:

Replace the carpet in the Police Station with slip-resistant, sound dampening, and water-resistant flooring.

Capital Costs	Historical Budgeted	FY2027	FY2028	FY2029	FY2030	FY2031	Total Budgeted
Planning/Design							\$0.00
Permits							\$0.00
Land/Right-of-way							\$0.00
Construction/Maintenance	\$99,078.00	\$150,000.00	\$0.00	\$0.00	\$0.00	\$0.00	\$249,078.00

Total	\$2,112,434.00	\$0.00	\$0.00	\$0.00	\$0.00	\$0.00	\$2,112,434.00

Additional Information

Type of Project: Facilities
Category: Carryover Project (Received previous appropriations)
Justification: Senior and Scout Community Center was originally constructed in the 1950s by the Boy Scouts and later donated to the City of Manhattan Beach. Through a public-private partnership with the Friends of Senior & Scout Community Center (Friends), the Friends would provide final design and permitted construction documents and the City would construct the building as a public project. Additionally, the Friends would provide furnishings for the building.

General Plan Element Goal(s): LU-3 Achieve a strong, positive community aesthetic.; CR-1 Maintain a park, recreation, and open space system that provides a variety of recreational opportunities accessible to all residents and meets the needs of all residents.

Upgrade Main Electrical Feed to Public Works Yard

Project Number: BL25016
Total Budgeted Capital Costs: \$500,000.00
Total Budgeted Funding Sources: \$500,000.00

Department: Bldg & Grounds Maintenance
Type: Facilities and Parks

Request description:
 Upgrade the main electrical feed to the Public Works Yard.

Capital Costs	Historical Budgeted	FY2027	FY2028	FY2029	FY2030	FY2031	Total Budgeted

Additional Information

Type of Project Facilities
Category Carryover Project (Received previous appropriations)
Justification An upgrade to the main electrical feed to the Public Works yard will minimize the risk of voltage and power surge issues. Upgrading the main electrical feed will also stabilize the flow of electricity, and ensure a consistent energy supply.
General Plan Element Goal(s) CS-1 Minimize the risks to public health, safety, and welfare resulting from natural and human-caused hazards.;
 CS-3 Maintain a high level of City emergency response services.

City Hall HVAC Replacement Phase 2

Total Budgeted Capital Costs: \$350,000.00
Total Budgeted Funding Sources: \$350,000.00

Department: Bldg & Grounds Maintenance
Type: Facilities and Parks

Request description:

Design and construct HVAC improvements to integrate existing dampers into the building's climate control system. Repair, reconfigure, and augment ductwork to provide proper heating and cooling throughout City Hall.

Capital Costs	Historical Budgeted	FY2027	FY2028	FY2029	FY2030	FY2031	Total Budgeted

Additional Information

Type of Project	Facilities
Category	New Project (Funding identified, not yet appropriated)
Justification	The current City Hall buildings were constructed in 1974, and the last major retrofit of the Heating, Ventilation, and Air Conditioning (HVAC) system was performed over 35 years ago. In 2021, City Council awarded a construction contract for Phase I of the City Hall HVAC Project, which involved the replacement of major system components. New equipment was installed and placed in operation in 2022. However, as indicated in the 2019 HVAC Assessment Report, a second phase of the project is necessary to address air flow deficiencies and optimize the building's climate control system.
General Plan Element Goal(s)	CS-1 Minimize the risks to public health, safety, and welfare resulting from natural and human-caused hazards.

Facilities Structural Assessment Study

Total Budgeted Capital Costs: \$325,000.00
Total Budgeted Funding Sources: \$325,000.00

Department: Bldg & Grounds Maintenance
Type: Facilities and Parks

Request description:

A comprehensive evaluation to determine the safety, stability, and condition of the City buildings' load-bearing components. It involves visual inspections, testing for defects like cracks or corrosion, and analyzing structural integrity to create a "road map" for repairs, renovations, or future planning.

Capital Costs	Historical Budgeted	FY2027	FY2028	FY2029	FY2030	FY2031	Total Budgeted

Additional Information

Type of Project	Facilities
Category	New Project (Funding identified, not yet appropriated)
Justification	The Public Works Department is conducting a best-practice structural condition assessment of aging City building facilities, including rough-order-of-magnitude cost estimates to plan future repairs and renovations. The purpose of the structural condition assessment is to document the current condition of City facilities such as City Hall, community centers, and park building facilities.
General Plan Element Goal(s)	CS-1 Minimize the risks to public health, safety, and welfare resulting from natural and human-caused hazards.

Police/Fire Facility Exterior Painting

Total Budgeted Capital Costs: \$500,000.00
Total Budgeted Funding Sources: \$500,000.00

Department: Bldg & Grounds Maintenance
Type: Facilities and Parks

Additional Information

Type of Project	Facilities
Category	Carryover Project (Received previous appropriations)
Justification	This property enables Manhattan Beach to strategically balance economic development by fostering sustainable revenue-generating projects while preserving our community-focused coastal identity. The aim is to establish public spaces that may include community facilities or amenities directly catering to residents' needs, thereby enhancing the quality of life in our lively coastal community. This approach seeks to maintain our local character while also creating opportunities for meticulously planned developments that can yield sustainable revenue streams for municipal services.
General Plan Element Goal(s)	LU-1 Maintain the low-profile development and small-town atmosphere of Manhattan Beach.; LU-7 Continue to support and encourage the viability of the Downtown area of Manhattan Beach.

School District Project

Project Number: OT20204
Total Budgeted Capital Costs: \$250,000.00
Total Budgeted Funding Sources: \$250,000.00

Department: Bldg & Grounds Maintenance
Type: Facilities and Parks

Request description:

The City will fund a CIP project for and in partnership with the Manhattan Beach Unified School District. The exact project scope and location will be determined.

Additional Information

Type of Project	Pier
Category	New Project (Funding identified, not yet appropriated)
Justification	The Manhattan Beach Pier is a reinforced concrete structure constructed between 1917 and 1920. The Pier is subjected to large recurring wave forces and exists in a corrosive marine environment where structural deterioration is accelerated. In the 1950s, the County of Los Angeles completed a major repair project where pneumatically placed concrete was placed on areas showing deterioration. This project resulted in an almost free form shape of the piles and girders. In the 1980s, corrosion in the reinforcing steel caused concrete to spall from the structure, causing hazardous conditions for persons walking under the Pier. In 1988, the City entered into an operating agreement with the State of California where the City took over maintenance responsibilities for the Pier. Also in 1988, a full structural assessment of the Pier was conducted that identified structural deficiencies and recommended rehabilitation. In 1991, the latest major rehabilitation project was completed. This project included the full removal and replacement of the Pier deck and much of the support structure. The last rehabilitation work was performed on the Pier in 2012 addressing localized structural deterioration (crack repairs). A structural condition assessment report was completed in 2026 including repair recommendations to extend the life span of the Pier.

General Plan Element Goal(s)	CR-1 Maintain a park, recreation, and open space system that provides a variety of recreational opportunities accessible to all residents and meets the needs of all residents.; CS-1 Minimize the risks to public health, safety, and welfare resulting from natural and human-caused hazards.

Additional Information

Type of Project Parks
Category Carryover Project (Received previous appropriations)
Justification Regular upkeep and maintenance of basketball, tennis, and pickleball courts at all City parks.
General Plan Element Goal(s) CR-1 Maintain a park, recreation, and open space system that provides a variety of recreational opportunities accessible to all residents and meets the needs of all residents.

Begg Pool Facility Upgrades

Project Number: RC24016
Total Budgeted Capital Costs: \$702,357.00
Total Budgeted Funding Sources: \$702,357.00

Department: Parks and Recreation
Type: Facilities and Parks

Request description:

In collaboration with the Public Works Department and School District Maintenance Staff, the Parks and Recreation Department has identified a priority list of 8 to 10 areas needing immediate repair. This project will concentrate on maintenance repairs at the Begg Pool Facility, specifically addressing the areas requiring urgent attention.

Additional Information

Type of Project	Facilities
Category	Carryover Project (Received previous appropriations)
Justification	Originally built in the 1940s, Begg Pool has served the community for approximately 80 years. Twenty-five yards long, six lanes wide, and approximately four-feet deep, the pool hosts a variety of recreation programs and classes, including swim lessons, lap swim, swim team, water aerobics, water therapy, senior and summer camp programs, Cardio Pulmonary Resuscitation (CPR) and water safety classes, recreational water play, and swim classes required by the Manhattan Beach Middle School. Although it has been renovated multiple times, the pool has reached an age where significant pool, mechanical, plumbing, locker room, and additional repairs are needed.
General Plan Element Goal(s)	CR-1 Maintain a park, recreation, and open space system that provides a variety of recreational opportunities accessible to all residents and meets the needs of all residents.

Deferred Parks Maintenance

Project Number: RC23008
Total Budgeted Capital Costs: \$625,125.00
Total Budgeted Funding Sources: \$625,125.00

Department: Parks and Recreation
Type: Facilities and Parks

Request description:

Address deferred parks maintenance citywide, which may include fencing, park furnishings and features. The final task list and spending plan is prioritized by the Parks & Recreation Department.

Additional Information

Type of Project: Parks
 Category: Carryover Project (Received previous appropriations)
 Justification: The restroom facility at Manhattan Heights Park is highly used and in need of upgrades. Installation of artificial turf in front of the building is needed due to heavy use by the Afterschool Program and consistent muddy conditions.
 General Plan Element Goal(s): CR-1 Maintain a park, recreation, and open space system that provides a variety of recreational opportunities accessible to all residents and meets the needs of all residents.

Manhattan Village Aquatic Pool Complex

Project Number: RC26007
Total Budgeted Capital Costs: \$40,000.00
Total Budgeted Funding Sources: \$40,000.00

Department: Parks and Recreation
Type: Facilities and Parks

Request description:

City to provide support for the private development of a joint-use pool at the Manhattan Village Parking Lot.

Additional Information

Type of Project: Facilities
Category: Carryover Project (Received previous appropriations)
Justification: On August 20, 2024, the City Council approved an MOU with the Bay Club expressing an intent to construct and operate an aquatic facility and related projects in cooperation with the City of Manhattan Beach on City-owned property currently leased to Bay Club.

General Plan Element Goal(s): CR-1 Maintain a park, recreation, and open space system that provides a variety of recreational opportunities accessible to all residents and meets the needs of all residents.

Manhattan Village Field Lighting Replacement

Project Number: RC16206
Total Budgeted Capital Costs: \$412,230.00
Total Budgeted Funding Sources: \$412,230.00

Department: Bldg & Grounds Maintenance
Type: Facilities and Parks

Request description:

This project will replace existing lighting fixtures with new LED fixtures and appurtenances and update the field lighting control system to allow flexible light management.

Additional Information

Type of Project: Parks
Category: Carryover Project (Received previous appropriations)
Justification: Over 5,000 participants from AYSO, youth clubs, and adult leagues play soccer annually in Manhattan Beach. The synthetic turf fields ensure year-round availability to meet the community's needs. However, the Manhattan Village Soccer Field is considered a premier field with high demand for its use. It has outdated halogen lighting and needs to be upgraded with efficient LED lighting, including a control link system for flexible management of the lights.
General Plan Element Goal(s): CR-1 Maintain a park, recreation, and open space system that provides a variety of recreational opportunities accessible to all residents and meets the needs of all residents.

Sand Dune Park Improvement Project

Project Number: RC23004
Total Budgeted Capital Costs: \$3,836,585.00
Total Budgeted Funding Sources: \$3,836,585.00

Department: Parks and Recreation
Type: Facilities and Parks

Request description:

In September 2024, City Council approved the Sand Dune Park final concept design. This project aims to construct the following park improvements: One tot lot and one playground for ages five to twelve, including two new fully accessible play structures; New fence and gates; An outdoor education area featuring a low wooden stage and low benches for elementary school children; A pedestrian lighting system is proposed for the entire park to enhance security and aesthetics; Two new prefabricated buildings with Spanish-style architecture; A new restroom and office building will anchor the site's south side and provide much-needed upgrades to the park's facilities; And, decorative perimeter fencing upgrades.

Additional Information

Type of Project	Parks
Category	Carryover Project (Received previous appropriations)
Justification	The City Council's Work Plan includes developing a Sand Dune Park Master Plan. During the joint City Council and Commissions meeting in January 2022, the City Council instructed staff and the Parks and Recreation Commission to explore ways to enhance Sand Dune Park. They were tasked with evaluating potential future uses, including nature areas, trails, park improvements, and a replacement for the existing building that currently serves as a workspace and storage area. The Parks and Recreation Commission approved the final concept design based on community feedback to move forward to the City Council. They aimed to improve the park's amenities while maintaining its distinctive character.
General Plan Element Goal(s)	CR-1 Maintain a park, recreation, and open space system that provides a variety of recreational opportunities accessible to all residents and meets the needs of all residents.

Begg Facility Parking Lot Resurfacing

Total Budgeted Capital Costs: \$700,000.00
Total Budgeted Funding Sources: \$700,000.00

Department: Bldg & Grounds Maintenance
Type: Facilities and Parks

Additional Information

Type of Project: Parks
Category: New Project (Funding identified, not yet appropriated)
Justification: The "Little Red House" in Manhattan Beach was built in 1907 as a craftsman beach bungalow style cottage. It is located in Polliwog Park and serves as the Manhattan Beach Historical Society Museum. The roof structure is in need of full replacement.

General Plan Element Goal(s): LU-3 Achieve a strong, positive community aesthetic.; CR-2 Enhance cultural arts program s in the community.

Annual Non-Motorized Transport. Program (Bike lanes, crosswalks)

Project Number: ST15835
Total Budgeted Capital Costs: \$340,000.00
Total Budgeted Funding Sources: \$340,000.00

Department: Public Works Transportation
Type: Facilities and Parks

Request description:

Provision of features to enhance non-motorized modes of transportation such as walking and biking.

Additional Information

Type of Project: Right-of-Way
Category: Carryover Project (Received previous appropriations)
Justification: This project provides an annual account from which pedestrian and bicycle enhancements could be funded. Improvements such as high visibility pedestrian crossings, bike lanes, pedestrian and bicycle related traffic-calming measures and other bicycle and pedestrian amenities would be funded through this project. Specific projects to be pursued include ones identified in the South Bay Bicycle Master Plan.
General Plan Element Goal(s): I-6 Create well-marked pedestrian and bicycle networks that facilitate these modes of circulation.

Annual Street Resurfacing Program

Project Number: ST19105
Total Budgeted Capital Costs: \$12,150,948.00
Total Budgeted Funding Sources: \$12,150,948.00

Department: Public Works Transportation
Type: Streets

Request description:

The project will mill and overlay pavement surfaces and replace displaced curbs, gutters, and sidewalk.

Additional Information

Type of Project	Annual
Category	Carryover Project (Received previous appropriations)
Justification	Locations are determined through the Triennial Pavement Management (TPM) System update. The TPM is an inspection of pavement surfaces to assess condition, prioritize rehabilitation and determine resources required to maintain street pavements in good condition.
General Plan Element Goal(s)	I-1 Provide a balanced transportation system that allow s the safe and efficient movement of people, goods and services throughout the City.; I-2 Move commuter traffic through the City primarily on arterial streets, and on collector streets as appropriate, to protect other streets from the intrusion of commuter traffic.; I-6 Create well-marked pedestrian and bicycle networks that facilitate these modes of circulation.

Biennial Slurry Seal Program

Project Number: ST16102
Total Budgeted Capital Costs: \$5,989,116.00
Total Budgeted Funding Sources: \$5,989,116.00

Department: Public Works Transportation
Type: Streets

Request description:

The Biennial Program slurry seals the City's streets. This project also includes asphalt preservation of city-maintained parking lots and School District properties located within each Slurry Seal Area.

Additional Information

Type of Project: Annual
Category: Carryover Project (Received previous appropriations)
Justification: The slurry seal asphalt pavement preservation process works to protect and prolong the life of asphalt surfaces. At the request of the School District, the School District properties within each Slurry Seal Area will be included in the Biennial Slurry Seal Program as funds allow. This cost is dependent upon oil prices and is adjusted based upon current cost data. The program reflects a continuation of the City's policy to slurry seal streets on a seven-area cycle.

General Plan Element Goal(s): I-1 Provide a balanced transportation system that allow s the safe and efficient movement of people, goods and services throughout the City.

Aviation Blvd Pavement Rehabilitation from Artesia Blvd to Manhattan Beach Blvd

Total Budgeted Capital Costs: \$4,575,000.00
Total Budgeted Funding Sources: \$4,575,000.00

Department: Public Works Transportation
Type: Streets

Request description:

The proposed project is to repair pavement surfaces, replace curbs, gutters, and sidewalk, install American with Disabilities Act (ADA) compliant curb ramps, and replace traffic striping for the road segment of Aviation Boulevard between Artesia Boulevard and Manhattan Beach Boulevard. This includes design, construction, and construction management/inspection services for the project. This proposed project is to be a collaboration between City of Manhattan Beach and City of Redondo Beach.

Additional Information

Type of Project	Streets-Pavement
Category	New Project (Funding identified, not yet appropriated)
Justification	Due to the high traffic volume and significant number of delivery and construction vehicles regularly traveling along this busy corridor, much of the pavement is severely distressed and cannot be repaired by isolated patchwork or asphalt resurfacing. The subject section of roadway to be evaluated by a pavement expert and a repair program recommended and implemented accordingly.
General Plan Element Goal(s)	I-1 Provide a balanced transportation system that allow s the safe and efficient movement of people, goods and services throughout the City.; I-2 Move commuter traffic through the City primarily on arterial streets, and on collector streets as appropriate, to protect other streets from the intrusion of commuter traffic.

Gateway and Monument Sign Replacement

Total Budgeted Capital Costs: \$400,000.00
Total Budgeted Funding Sources: \$400,000.00

Department: Bldg & Grounds Maintenance
Type: Facilities and Parks

Request description:

Replacement of City identity monument signs at perimeter gateway locations, and at City parks and facilities, as needed. Including the following locations: Rosecrans and Highland Ave, Rosecrans Ave and Sepulveda Blvd, Rosecrans and Redondo Ave, Aviation Blvd and Marine Ave, Aviation and Manhattan Beach Blvd, Artesia and Sepulveda Blvd, Ardmore Ave and Boundary Place

Additional Information

Type of Project Facilities
Category Carryover Project (Received previous appropriations);;New Project (Funding identified, not yet appropriated)
Justification Uniform sign design is to be employed Citywide per the Wayfinding Masterplan approved by City Council.
General Plan Element Goal(s) LU-3 Achieve a strong, positive community aesthetic.;
 CR-1 Maintain a park, recreation, and open space system that provides a variety of recreational opportunities accessible to all residents and meets the needs of all residents.

Outdoor Dining Project - Flex Spaces

Total Budgeted Capital Costs: \$1,000,000.00
Total Budgeted Funding Sources: \$1,000,000.00

Department: Street Maintenance
Type: Streets

Request description:

Public flex spaces are improvements in non-vehicular right-of-way areas that can accommodate a variety of public serving amenities such as street furniture, bike facilities, signage, landscaping, hardscaping, and so forth. The intent of this concept was to counter balance privatization of public spaces for commercial outdoor dining by Eating and Drinking Establishments so as to provide additional opportunities that promote coastal access and recreational resources for the general public. Potential locations contemplated during the long-term outdoor dining program development focused on sidewalks along Manhattan Beach Blvd., Manhattan Ave., and Highlight Ave. in Downtown and North Manhattan Beach, which may go hand-in-hand with beautification efforts.

Capital Costs	Historical Budgeted	FY2027	FY2028	FY2029	FY2030	FY2031	Total Budgeted

Additional Information

Type of Project	Other
Category	New Project (Funding identified, not yet appropriated)
Justification	Current signs are a mix of "one-off" custom designs, departmental branding, and standard regulatory-style signs. In order to provide uniformity and location familiarity while in and around City of Manhattan Beach facilities, standardized layout, color, sizing, typeface/font, and logo/branding are desirable. Residents and visitors alike should be able to readily identify city-owned and operated facilities.
General Plan Element Goal(s)	I-1 Provide a balanced transportation system that allow s the safe and efficient movement of people, goods and services throughout the City.; I-2 Move commuter traffic through the City primarily on arterial streets, and on collector streets as appropriate, to protect other streets from the intrusion of commuter traffic.; LU-3 Achieve a strong, positive community aesthetic.

Gas Tax Fund

Voter Center ADA Improvements

Additional Information

Type of Project: Grants and Special Funds
Category: Carryover Project (Received previous appropriations)
Justification: The Community Development Block Grant (CDBG) Program provides funding to develop viable urban communities with decent housing, a suitable living environment, and expanded economic opportunities primarily for people of low and moderate-income. Eligible activities under the CDBG Program are limited to the construction, reconstruction, rehabilitation, or installation of public improvements or public facilities, specifically including ADA ramps and removing barriers to access near schools, senior centers, and residential areas.
General Plan Element Goal(s): I-6 Create well-marked pedestrian and bicycle networks that facilitate these modes of circulation.

ADA Ramps Cycle 5

Project Number: ST26002
Total Budgeted Capital Costs: \$60,000.00
Total Budgeted Funding Sources: \$60,000.00

Department: Public Works Transportation
Type: Facilities and Parks

Request description:

Upgrade or replacement of curb ramps at various locations throughout the City to comply with the American with Disabilities Act requirements.

Additional Information

Type of Project	Annual
Category	Carryover Project (Received previous appropriations)
Justification	Repairs may include replacement of cracked, damaged, or lifted sections of roadway or sidewalk, reconfiguration of non-compliant ADA ramps, removal of obstructions, and/or correction of drainage issues. Depending on the location, concrete repairs may eliminate trip hazards, increase pedestrian accessibility, reduce ponding of surface water, and improve roadway safety and rideability. A portion of the project budget may be used to make concrete improvements (i.e. new curb, gutter, sidewalk) ahead of roadway resurfacing or slurry application. Priorities are established from the Triennial Pavement Management Plan (PMP), resident requests, and the Field Operations Division neighborhood maintenance work program.
General Plan Element Goal(s)	I-1 Provide a balanced transportation system that allow s the safe and efficient movement of people, goods and services throughout the City.; I-6 Create well-marked pedestrian and bicycle networks that facilitate these modes of circulation.;

Annual Street Resurfacing Program

Project Number: ST19105
Total Budgeted Capital Costs: \$12,150,948.00
Total Budgeted Funding Sources: \$12,150,948.00

Department: Public Works Transportation
Type: Streets

Request description:

The project will mill and overlay pavement surfaces and replace displaced curbs, gutters, and sidewalk.

Additional Information

Type of Project: Annual
Category: Carryover Project (Received previous appropriations)
Justification: Locations are determined through the Triennial Pavement Management (TPM) System update. The TPM is an inspection of pavement surfaces to assess condition, prioritize rehabilitation and determine resources required to maintain street pavements in good condition.

General Plan Element Goal(s):
I-1 Provide a balanced transportation system that allow s the safe and efficient movement of people, goods and services throughout the City.;
I-2 Move commuter traffic through the City primarily on arterial streets, and on collector streets as appropriate, to protect other streets from the intrusion of commuter traffic.;
I-6 Create well-marked pedestrian and bicycle networks that facilitate these modes of circulation.

Biennial Slurry Seal Program

Project Number: ST16102
Total Budgeted Capital Costs: \$5,989,116.00
Total Budgeted Funding Sources: \$5,989,116.00

Department: Public Works Transportation
Type: Streets

Request description:

The Biennial Program slurry seals the City's streets. This project also includes asphalt preservation of city-maintained parking lots and School District properties located within each Slurry Seal Area.

Additional Information

Type of Project: Annual
Category: Carryover Project (Received previous appropriations)
Justification: The slurry seal asphalt pavement preservation process works to protect and prolong the life of asphalt surfaces. At the request of the School District, the School District properties within each Slurry Seal Area will be included in the Biennial Slurry Seal Program as funds allow. This cost is dependent upon oil prices and is adjusted based upon current cost data. The program reflects a continuation of the City's policy to slurry seal streets on a seven-area cycle.

General Plan Element Goal(s): I-1 Provide a balanced transportation system that allow s the safe and efficient movement of people, goods and services throughout the City.

Intersection Improvements Project (Cycle 11 HSIP)

Project Number: ST24018
Total Budgeted Capital Costs: \$220,552.00
Total Budgeted Funding Sources: \$220,552.00

Department: Street Maintenance
Type: Streets

Request description:

This project involves implementing pedestrian safety measures at three locations: Manhattan Avenue and 36th Street, Valley Drive and Flourney Road, and Highland Avenue and 40th Street. Improvements may include the installation of crosswalks, construction of Americans with Disabilities Act (ADA) compliant ramps, signage installation, and other enhancements, such as Rectangular Rapid Flashing Beacons (RRFB), if needed.

Additional Information

Type of Project Streets-Pedestrian Improvements
Category Carryover Project (Received previous appropriations)
Justification Highway Safety Improvement Program (HSIP) Cycle 11 funding was awarded to improve three intersections as identified in the City's Local Road Safety Plan.
General Plan Element Goal(s) I-6 Create well-marked pedestrian and bicycle networks that facilitate these modes of circulation.

Manhattan Beach Blvd Pavement Rehabilitation from Sepulveda Blvd to Pacific Ave

Project Number: ST25010
Total Budgeted Capital Costs: \$3,505,000.00
Total Budgeted Funding Sources: \$3,505,000.00

Department: Public Works Transportation
Type: Streets

Request description:

The proposed project is to repair pavement surfaces, replace curbs, gutters, and sidewalk, install American with Disabilities Act (ADA) compliant curb ramps, and replace traffic striping for the road segment of Manhattan Beach Boulevard between Sepulveda Boulevard and Dianthus Street. This includes design, construction, and construction management/inspection services for the project.

Capital Costs	Historical Budgeted	FY2027	FY2028	FY2029	FY2030	FY2031	Total Budgeted

Additional Information

Type of Project	Streets-Pavement
Category	Carryover Project (Received previous appropriations)
Justification	Manhattan Beach Boulevard west of Sepulveda Boulevard was resurfaced in 2009. Due to the high traffic volume and significant number of delivery and construction vehicles regularly traveling along this busy corridor, much of the pavement is severely distressed and cannot be repaired by isolated patchwork or asphalt resurfacing. The subject section of roadway to be evaluated by a pavement expert and a repair program recommended and implemented accordingly.
General Plan Element Goal(s)	I-1 Provide a balanced transportation system that allow s the safe and efficient movement of people, goods and services throughout the City.; I-2 Move commuter traffic through the City primarily on arterial streets, and on collector streets as appropriate, to protect other streets from the intrusion of commuter traffic.

Ocean Drive Walk Street Crossings

Project Number: ST19106
Total Budgeted Capital Costs: \$250,000.00
Total Budgeted Funding Sources: \$250,000.00

Department: Public Works Transportation
Type: Streets

Request description:
Construct raised or decorative crosswalks on Ocean Drive at walkstreets (25 locations).

Capital Costs	Historical Budgeted	FY2027	FY2028	FY2029	FY2030	FY2031	Total Budgeted
Planning/Design	\$100,000.00	\$0.00	\$0.00	\$0.00	\$0.00	\$0.00	\$100,000.00
Permits							\$0.00

Total	\$250,000.00	\$0.00	\$0.00	\$0.00	\$0.00	\$0.00	\$250,000.00

Additional Information

Type of Project Streets-Pedestrian Improvements
Category Carryover Project (Received previous appropriations)
Justification The project will design and construct 25 raised and/or decorative crosswalks on Ocean Drive at walkstreet crossings. The enhanced crossings will improve pedestrian safety and calm traffic along Ocean Drive. These improvements will also encourage beach access and enhance the view along the walkstreets. Enhanced crossing treatments have been recommended in the City's Mobility Plan and have been requested by numerous residents.
General Plan Element Goal(s) I-6 Create well-marked pedestrian and bicycle networks that facilitate these modes of circulation.

Triennial Pavement Management System Update

Project Number: ST24001
Total Budgeted Capital Costs: \$259,085.00
Total Budgeted Funding Sources: \$259,085.00

Department: Public Works Transportation

Additional Information

Type of Project	Streets-Pavement
Category	Carryover Project (Received previous appropriations)
Justification	State, Federal, and County regulations require that cities maintain a pavement management system. A pavement management system is a management tool to assist in the development of efficient pavement maintenance and rehabilitation programs. The City is required to inspect pavement conditions on a triennial basis. The evaluations will update pavement conditions for all streets in the City except Sepulveda Boulevard, which is a State Highway. The 2024 update to the Pavement Management System was completed November 2024. Next update is to be completed in 2027.
General Plan Element Goal(s)	I-1 Provide a balanced transportation system that allow s the safe and efficient movement of people, goods and services throughout the City.

ADA Ramps Cycle 7

Total Budgeted Capital Costs: \$100,000.00
Total Budgeted Funding Sources: \$100,000.00

Department: Public Works Transportation
Type: Facilities and Parks

Request description:

Upgrade or replacement of curb ramps at various locations throughout the City to comply with the American with Disabilities Act requirements.

Type of Project	Grants and Special Funds
Category	Carryover Project (Received previous appropriations)::New Project (Funding identified, not yet appropriated)
Justification	The Community Development Block Grant (CDBG) Program provides funding to develop viable urban communities with decent housing, a suitable living environment, and expanded economic opportunities primarily for people of low and moderate-income. Eligible activities under the CDBG Program are limited to the construction, reconstruction, rehabilitation, or installation of public improvements or public facilities, specifically including ADA ramps and removing barriers to access near schools, senior centers, and residential areas.
General Plan Element Goal(s)	I-6 Create well-marked pedestrian and bicycle networks that facilitate these modes of circulation.

Aviation Blvd Pavement Rehabilitation from Artesia Blvd to Manhattan Beach Blvd

Total Budgeted Capital Costs: \$4,575,000.00
Total Budgeted Funding Sources: \$4,575,000.00

Department: Public Works Transportation
Type: Streets

Request description:

The proposed project is to repair pavement surfaces, replace curbs, gutters, and sidewalk, install American with Disabilities Act (ADA) compliant curb ramps, and replace traffic striping for the road segment of Aviation Boulevard between Artesia Boulevard and Manhattan Beach Boulevard. This includes design, construction, and construction management/inspection services for the project. This proposed project is to be a collaboration between City of Manhattan Beach and City of Redondo Beach.

Additional Information

Type of Project	Streets-Pavement
Category	New Project (Funding identified, not yet appropriated)
Justification	Due to the high traffic volume and significant number of delivery and construction vehicles regularly traveling along this busy corridor, much of the pavement is severely distressed and cannot be repaired by isolated patchwork or asphalt resurfacing. The subject section of roadway to be evaluated by a pavement expert and a repair program recommended and implemented accordingly.
General Plan Element Goal(s)	I-1 Provide a balanced transportation system that allow s the safe and efficient movement of people, goods and services throughout the City.; I-2 Move commuter traffic through the City primarily on arterial streets, and on collector streets as appropriate, to protect other streets from the intrusion of commuter traffic.

Additional Information

Type of Project	Annual
Category	Carryover Project (Received previous appropriations)
Justification	In 2018, the City completed a Citywide Traffic Signal Inventory and Design Maintenance Recommendations Report. 21 intersections were identified as deficient in that report and require upgrading. This program allows for the equipment at these intersections to be upgraded based on the established priority list. Scope includes replacement of poles, traffic signal cabinets, battery back-up systems (BBS), and/or closed-circuit television (CCTV) cameras.
General Plan Element Goal(s)	I-1 Provide a balanced transportation system that allow s the safe and efficient movement of people, goods and services throughout the City; I-2 Move commuter traffic through the City primarily on arterial streets, and on collector streets as appropriate, to protect other streets from the intrusion of commuter traffic.

Annual Street Resurfacing Program

Project Number: ST19105
Total Budgeted Capital Costs: \$12,150,948.00
Total Budgeted Funding Sources: \$12,150,948.00

Department: Public Works Transportation
Type: Streets

Request description:

The project will mill and overlay pavement surfaces and replace displaced curbs, gutters, and sidewalk.

Additional Information

Type of Project Other
Category Carryover Project (Received previous appropriations)
Justification Currently, the City's traffic signals along the arterial corridors throughout Manhattan Beach are activated using one or more standard technologies, including loop detection, video detection and pre-set signal timing. These intersections experience high levels of outbound, inbound, and through traffic during peak commute hours. The traffic signals' controls are limited by dated technologies, and they are physically maintained and programmed on-site by the Los Angeles County Department of Public Works (LACDPW) through a long-standing City-County Maintenance Service Agreement. The City's MBATS System Project aims to upgrade the traffic signal controller equipment and establish a fiber optic backbone infrastructure. This will facilitate the integration of advanced traffic management technologies, including dynamic signal timing, vehicle-to-vehicle communication, autonomous vehicles, public safety preemption, and other smart city initiatives. The goal is to improve traffic signal systems and enhance operational efficiency.

General Plan Element Goal(s) I-1 Provide a balanced transportation system that allow s the safe and efficient movement of people, goods and services throughout the City.

Manhattan Beach Blvd Pavement Rehabilitation from Sepulveda Blvd to Pacific Ave

Project Number: ST25010
Total Budgeted Capital Costs: \$3,505,000.00
Total Budgeted Funding Sources: \$3,505,000.00

Department: Public Works Transportation
Type: Streets

Request description:

The proposed project is to repair pavement surfaces, replace curbs, gutters, and sidewalk, install American with Disabilities Act (ADA) compliant curb ramps, and replace traffic striping for the road segment of Manhattan Beach Boulevard between Sepulveda Boulevard and Dianthus Street. This includes design, construction, and construction management/inspection services for the project.

Additional Information

Type of Project	Streets-Pavement
Category	Carryover Project (Received previous appropriations)
Justification	Manhattan Beach Boulevard west of Sepulveda Boulevard was resurfaced in 2009. Due to the high traffic volume and significant number of delivery and construction vehicles regularly traveling along this busy corridor, much of the pavement is severely distressed and cannot be repaired by isolated patchwork or asphalt resurfacing. The subject section of roadway to be evaluated by a pavement expert and a repair program recommended and implemented accordingly.
General Plan Element Goal(s)	I-1 Provide a balanced transportation system that allow s the safe and efficient movement of people, goods and services throughout the City.; I-2 Move commuter traffic through the City primarily on arterial streets, and on collector streets as appropriate, to protect other streets from the intrusion of commuter traffic.

MB Blvd and Pacific Ave Intersection Improvements

Project Number: ST24002
Total Budgeted Capital Costs: \$1,150,660.00
Total Budgeted Funding Sources: \$1,150,660.00

Department: Public Works Transportation
Type: Streets

Request description:

The project aims to enhance the merging area along Manhattan Beach Boulevard at Pacific Avenue, increase safety, and provide smoother traffic flow by reconfiguring the intersection layout and adjusting signal timing in all directions.

Additional Information

Type of Project	Streets-Capacity Improvements
Category	Carryover Project (Received previous appropriations)
Justification	The intersection of Manhattan Beach Boulevard (MBB) and Pacific Avenue is situated in an urban residential area near several schools, commercial offices, medical facilities, and activity centers. MBB is the main arterial roadway connecting the 405 Freeway to the iconic Manhattan Beach Pier and beach, approximately half a mile from this intersection. Pacific Avenue is an important local route west of Sepulveda Boulevard in Manhattan Beach, facilitating north-south commuting traffic during peak periods. The vehicles will likely detour onto Pacific Avenue during congestion on Sepulveda Boulevard. The project aims to ease congestion and enable smooth traffic flow, ultimately enhancing safety features in the MBB traffic corridor.
General Plan Element Goal(s)	I-1 Provide a balanced transportation system that allow s the safe and efficient movement of people, goods and services throughout the City.

MB Blvd Eastbound Left-Turn Improvement at Aviation Blvd

Project Number: ST23006
Total Budgeted Capital Costs: \$169,906.00
Total Budgeted Funding Sources: \$169,906.00

Department: Public Works Transportation
Type: Streets

Request description:

The proposed project will lengthen the existing eastbound left-turn lane pocket from approximately 200 feet to 330 feet. The project scope involves reconstructing the median island on Manhattan Beach Boulevard west of Aviation Boulevard. The project does not include any modifications to the number of travel lanes, does not require the removal of on-street parking, and would keep the currently allowed eastbound U-turn activities. The project also involves relocating the existing monument sign further west in the median and removing a cluster of small palm trees.

Capital Costs	Historical Budgeted	FY2027	FY2028	FY2029	FY2030	FY2031	Total Budgeted

Total	\$169,906.00	\$0.00	\$0.00	\$0.00	\$0.00	\$0.00	\$169,906.00

Additional Information

Type of Project Streets-Capacity Improvements
Category Carryover Project (Received previous appropriations)
Justification Currently, the eastbound left-turn pocket length on Manhattan Beach Boulevard at Aviation Boulevard is 200 feet, which accommodates approximately 10 queueing cars. Due to the high demand for eastbound left-turning traffic, especially during the peak commuting periods, and insufficient storage capacity in the eastbound left-turn lane, vehicles are queued into the number one eastbound through-lane, impeding traffic.
General Plan Element Goal(s) I-1 Provide a balanced transportation system that allow s the safe and efficient movement of people, goods and services throughout the City.

Aviation Blvd Pavement Rehabilitation from Artesia Blvd to Manhattan Beach Blvd

Total Budgeted Capital Costs: \$4,575,000.00
Total Budgeted Funding Sources: \$4,575,000.00

Department: Public Works Transportation
Type: Streets

Request description:

The proposed project is to repair pavement surfaces, replace curbs, gutters, and sidewalk, install American with Disabilities Act (ADA) compliant curb ramps, and replace traffic striping for the road segment of Aviation Boulevard between Artesia Boulevard and Manhattan Beach Boulevard. This includes design, construction, and construction management/inspection services for the project. This proposed project is to be a collaboration between City of Manhattan Beach and City of Redondo Beach.

Additional Information

Type of Project: Annual
Category: Carryover Project (Received previous appropriations)
Justification: Locations are determined through the Triennial Pavement Management (TPM) System update. The TPM is an inspection of pavement surfaces to assess condition, prioritize rehabilitation and determine resources required to maintain street pavements in good condition.

General Plan Element Goal(s):
I-1 Provide a balanced transportation system that allow s the safe and efficient movement of people, goods and services throughout the City.;
I-2 Move commuter traffic through the City primarily on arterial streets, and on collector streets as appropriate, to protect other streets from the intrusion of commuter traffic.;
I-6 Create well-marked pedestrian and bicycle networks that facilitate these modes of circulation.

Aviation Blvd and 33rd Sidewalk Gap Project (Partial Grant 5310)

Project Number: ST20102
Total Budgeted Capital Costs: \$1,035,795.00
Total Budgeted Funding Sources: \$1,035,795.00

Department: Public Works Transportation
Type: Streets

Request description:

Install new sidewalk along the west side of Aviation Blvd from 33rd Street to approximately 600 feet north of 33rd Street. This work includes removal and replacement of existing irrigation/landscaping, installation of new masonry retaining wall with cable fencing, driveway replacements, installation of new ADA compliant curb ramps, and various improvements to protect existing signs and fencing. The project also involves obtaining temporary construction easements and pedestrian easements from 3 commercial properties prior to construction beginning.

Additional Information

Type of Project Streets-Pedestrian Improvements
Category Carryover Project (Received previous appropriations)
Justification This is a busy, wide arterial roadway. The proposed sidewalk provides an important quality of life amenity for pedestrians to connect employment centers to other commercial, entertainment and eatery establishments in the area and is in line with the city's American with Disabilities Act (ADA) Transition plan.
General Plan Element Goal(s) I-6 Create well-marked pedestrian and bicycle networks that facilitate these modes of circulation.

LA County Manhattan Beach Boulevard Traffic Signal Synchronization Project

Project Number: ST26015
Total Budgeted Capital Costs: \$72,000.00
Total Budgeted Funding Sources: \$72,000.00

Department: Public Works Transportation
Type: Streets

Request description:

In 2013, Los Angeles County Department of Public Works (County) applied for a Metro Call for Projects Grant for the South Bay Forum Traffic Signal Corridors Project (Project). The City submitted a support letter in conjunction with the grant application. In 2026, the County completed preliminary engineering, final design and contract administration and will perform construction engineering, traffic control and other work necessary to complete the installation of traffic signal improvements at the intersections of Manhattan Beach Blvd and Poinsettia Ave, Target Driveway, Meadows Ave, Peck Ave, Redondo Ave, and Aviation Blvd. This work is included in a County administered project on behalf of all shared jurisdictions, which includes work within the City of Manhattan Beach. Under the Metro Call for Projects Memorandum of Understanding, the City is responsible for a 20% share of the cost that the County incurs to complete the proposed improvements within the City. The County will collect the City's share of project costs based on the Project's Engineering Estimate. The City jurisdictional share of the project cost is estimated to be \$72,000.00. The project cost includes the City's estimated contribution (3.5%) to the County's Liability Trust Fund under the terms of the General Services Agreement. The City's actual cost will be determined by the final accounting 120 days after project completion, which cost will be based on the improvements located within City's jurisdiction. At the completion of all improvements, the County will tabulate the final accounting of expenditures to determine the actual costs involved. If the City's initial deposit is less than actual costs incurred, the County will invoice the City for the difference. However, if the City's initial deposit is more than the actual costs incurred, the County will then refund the difference to the City.

Total	\$1,675,000.00	\$0.00	\$0.00	\$0.00	\$0.00	\$0.00	\$1,675,000.00

Additional Information

Type of Project: Non-Motorized Transportation
Category: Carryover Project (Received previous appropriations)
Justification: Identified in the South Bay Bicycle Master Plan, this project will provide a continuous bike path along Rosecrans Avenue from Highland Avenue to Sepulveda Blvd utilizing a partial US DOT Community Project Funding/Congressionally Directed Spending (CPFCDs) Project.
General Plan Element Goal(s): I-6 Create well-marked pedestrian and bicycle networks that facilitate these modes of circulation.

Aviation Blvd Pavement Rehabilitation from Artesia Blvd to Manhattan Beach Blvd

Total Budgeted Capital Costs: \$4,575,000.00
Total Budgeted Funding Sources: \$4,575,000.00

Department: Public Works Transportation
Type: Streets

Request description:

The proposed project is to repair pavement surfaces, replace curbs, gutters, and sidewalk, install American with Disabilities Act (ADA) compliant curb ramps, and replace traffic striping for the road segment of Aviation Boulevard between Artesia Boulevard and Manhattan Beach Boulevard. This includes design, construction, and construction management/inspection services for the project. This proposed project is to be a collaboration between City of Manhattan Beach and City of Redondo Beach.

Total	\$1,470,405.00	\$0.00	\$0.00	\$0.00	\$0.00	\$0.00	\$1,470,405.00

Additional Information

Type of Project	Streets-Capacity Improvements
Category	Carryover Project (Received previous appropriations)
Justification	This intersection is situated in a part of the City where on-street parking is limited, and pedestrian traffic is moderately heavy. The left-turn movements for westbound, eastbound, and northbound traffic at the Sepulveda and Manhattan Beach Boulevard intersection are congested due to insufficient lane capacity. The design and construction of the area prioritize minimizing the impact on the livelihoods of residents, visitors, and businesses.
General Plan Element Goal(s)	I-1 Provide a balanced transportation system that allow s the safe and efficient movement of people, goods and services throughout the City.

Additional Information

Type of Project: Facilities
Category: Carryover Project (Received previous appropriations)
Justification: The escalators are nearing the end of their useful life and require frequent repairs.
General Plan Element Goal(s): LU-6 Maintain the viability of the commercial areas of Manhattan Beach.;
LU-7 Continue to support and encourage the viability of the Downtown area of Manhattan Beach.

Redesign and Repurpose of Metlox Slab Fountain Area

Project Number: BL24020
Total Budgeted Capital Costs: \$190,000.00
Total Budgeted Funding Sources: \$190,000.00

Department: Bldg & Grounds Maintenance
Type: Facilities and Parks

Request description:

Redesign and repurpose the existing slab fountain in Metlox Plaza.

Additional Information

Type of Project: Annual
Category: Carryover Project (Received previous appropriations)
Justification: The City's parking meters are aging and require replacement and upgrade to newer technology.
General Plan Element Goal(s): I-3 Ensure that adequate parking and loading facilities are available to support both residential and commercial needs.

Interim Parking Lot 3 Project

Project Number: PK25021
Total Budgeted Capital Costs: \$225,000.00
Total Budgeted Funding Sources: \$225,000.00

Department: Parking Facilities
Type: Parking Lots

Request description:

An interim surface parking lot was substantially completed in June 2025 to quickly provide additional parking in the downtown area until the permanent redevelopment of the Parking Lot 3 parcel is completed. The Interim Parking Lot 3 Project will continue the forthcoming Southern California Edison electrical service, design, and installation of the electric vehicle charging stations required by the building code.

Additional Information

Type of Project: Parking
Category: Carryover Project (Received previous appropriations)
Justification: The Lot 3 Parking Structure located at the southwest corner of 12th Street and Morningside Drive was closed in summer 2024 and fully demolished in fall 2024 after City Council declared a Local Emergency due to advanced deterioration of structural components that were revealed during an onsite assessment.
General Plan Element Goal(s): I-3 Ensure that adequate parking and loading facilities are available to support both residential and commercial needs.;
LU-3 Achieve a strong, positive community aesthetic.;
LU-7 Continue to support and encourage the viability of the Downtown area of Manhattan Beach.

Parking Structure Lot 3 Parcel Redevelopment Project

Project Number: PK25020
Total Budgeted Capital Costs: \$1,399,784.00
Total Budgeted Funding Sources: \$1,399,784.00

Department: Parking Facilities
Type: Parking Lots

Request description:

The City will hire a consultant team to explore potential redevelopment options for the Parking Lot 3 parcel, and prepare concept-level designs for each of the preferred options. Pending City Council direction, staff will then hire a design consultant to prepare construction documents, which include plans, specifications, and estimates, for the selected redevelopment.

Total	\$100,000.00	\$400,000.00	\$0.00	\$0.00	\$0.00	\$0.00	\$500,000.00

Additional Information

Type of Project: Parking
Category: Carryover Project (Received previous appropriations)
Justification: Water intrusion has been observed in the subterranean parking structures for City Hall and the Police/Fire Facility causing water drips and staining of the concrete. The project proposed installing a moisture mitigating primer at the locations of the intrusion and sealing the surface lots and planters above the garages to prevent future problems from weather or irrigation.

General Plan Element Goal(s): LU-3 Achieve a strong, positive community aesthetic.; CS-1 Minimize the risks to public health, safety, and welfare resulting from natural and human-caused hazards.

Annual Parking Facilities Capital Improvements Program

Total Budgeted Capital Costs: \$2,250,000.00
Total Budgeted Funding Sources: \$2,250,000.00

Department: Parking Facilities
Type: Parking Lots

Request description:

Repair and refurbish City-owned parking structures based on engineering assessments and Council direction.

Additional Information

Type of Project	Annual
Category	Carryover Project (Received previous appropriations);;New Project (Funding identified, not yet appropriated)
Justification	This project reflects funding for deficiencies in maintaining City-owned parking lots and structures. The scope of work could include spall repair, handrail repair or replacement, weatherproofing, pavement preservation such as slurry seal or resurfacing, and other capital improvement needs.
General Plan Element Goal(s)	I-3 Ensure that adequate parking and loading facilities are available to support both residential and commercial needs.; LU-7 Continue to support and encourage the viability of the Downtown area of Manhattan Beach.; LU-9 Preserve the low-intensity, pedestrian-oriented character of commercial areas in the North End and El Porto.

Paint Metlox Parking Structure

Total Budgeted Capital Costs: \$500,000.00
Total Budgeted Funding Sources: \$500,000.00

Department: Parking Facilities
Type: Parking Lots

Request description:

Paint the inside walls and ceiling of the Metlox parking structure.

Additional Information

Type of Project Pier
Category Carryover Project (Received previous appropriations)
Justification The Public Works Department conducts a best-practice structural assessment of the pier deck and pilings (above and below water) approximately every 10 to 15 years. The last comprehensive inspection of the Pier took place in 2011, followed by minor repairs in 2012. The 2026 Pier Structural Inspection Condition Assessment Report is a component of a design repair initiative aimed at identifying possible defects in the Pier and establishing related repair priorities. The report emphasizes the detection of deficiencies in relation to an upcoming repair project.

General Plan Element Goal(s) CS-1 Minimize the risks to public health, safety, and welfare resulting from natural and human-caused hazards.

Pier Improvements Project

Total Budgeted Capital Costs: \$2,450,000.00
Total Budgeted Funding Sources: \$2,450,000.00

Department: Bldg & Grounds Maintenance
Type: State Pier and Lot

Request description:

Repairs to the concrete deck soffit, concrete caps and beams, and concrete piles above water per the 2026 Pier Structural Inspection Condition Assessment Report.

Additional Information

Type of Project	Pier
Category	New Project (Funding identified, not yet appropriated)
Justification	The Manhattan Beach Pier is a reinforced concrete structure constructed between 1917 and 1920. The Pier is subjected to large recurring wave forces and exists in a corrosive marine environment where structural deterioration is accelerated. In the 1950s, the County of Los Angeles completed a major repair project where pneumatically placed concrete was placed on areas showing deterioration. This project resulted in an almost free form shape of the piles and girders. In the 1980s, corrosion in the reinforcing steel caused concrete to spall from the structure, causing hazardous conditions for persons walking under the Pier. In 1988, the City entered into an operating agreement with the State of California where the City took over maintenance responsibilities for the Pier. Also in 1988, a full structural assessment of the Pier was conducted that identified structural deficiencies and recommended rehabilitation. In 1991, the latest major rehabilitation project was completed. This project included the full removal and replacement of the Pier deck and much of the support structure. The last rehabilitation work was performed on the Pier in 2012 addressing localized structural deterioration (crack repairs). A structural condition assessment report was completed in 2026 including repair recommendations to extend the life span of the Pier.
General Plan Element Goal(s)	CR-1 Maintain a park, recreation, and open space system that provides a variety of recreational opportunities accessible to all residents and meets the needs of all residents.; CS-1 Minimize the risks to public health, safety, and welfare resulting from natural and human-caused hazards.

Upper Pier Parking Lots Railing Replacement Project

Total Budgeted Capital Costs: \$1,000,000.00
Total Budgeted Funding Sources: \$1,000,000.00

Department: Bldg & Grounds Maintenance
Type: State Pier and Lot

Request description:

Replacement of the perimeter railings at the upper State Pier Parking Lots, and replacing affected sections of the railings along the bike path.

Additional Information

Type of Project	Streets-Capacity Improvements
Category	Carryover Project (Received previous appropriations)
Justification	The City of Manhattan Beach Mobility Plan (May 2018) adopted the Complete Streets best practices. Complete Streets means a comprehensive, integrated transportation network with infrastructure and design that allows safe and convenient travel along and across streets for all users, including pedestrians, users and operators of public transit, bicyclists, persons with disabilities, seniors, children, motorists, users of green modes, and movers of commercial goods. To comply with the City of Manhattan Beach Mobility Plan and implement the Complete Streets best practices, the proposed Highland Avenue Corridor Improvement Project will promote a balanced multi-modal transportation corridor that “meets the needs of all users of streets, including motorists, bicyclists, children, persons with disabilities, seniors, movers of commercial goods, and users of public transportation”, according to California Complete Streets Act (AB 1358). The Metro Board approved \$500,000 in Measure M funding for the project design in September 2023.
General Plan Element Goal(s)	I-1 Provide a balanced transportation system that allow s the safe and efficient movement of people, goods and services throughout the City.

Intersection Improvements Project (Cycle 11 HSIP)

Project Number: ST24018
Total Budgeted Capital Costs: \$220,552.00
Total Budgeted Funding Sources: \$220,552.00

Department: Street Maintenance
Type: Streets

Request description:

This project involves implementing pedestrian safety measures at three locations: Manhattan Avenue and 36th Street, Valley Drive and Flournoy Road, and Highland Avenue and 40th Street. Improvements may include the installation of crosswalks, construction of Americans with Disabilities Act (ADA) compliant ramps, signage installation, and other enhancements, such as Rectangular Rapid Flashing Beacons (RRFB), if needed.

Rosecrans Bike Lane Improvements (Partial Grant CPF)

Project Number: ST20103
Total Budgeted Capital Costs: \$1,675,000.00
Total Budgeted Funding Sources: \$1,675,000.00

Department: Public Works Transportation
Type: Streets

Request description:

The project will implement a new bicycle lane and fill the gaps from the Sepulveda Boulevard and Rosecrans Avenue intersection to the Marvin Braude Bike Trail connection via Highland Avenue and 45th Street.

Additional Information

Type of Project: Non-Motorized Transportation
Category: Carryover Project (Received previous appropriations)
Justification: Identified in the South Bay Bicycle Master Plan, this project will provide a continuous bike path along Rosecrans Avenue from Highland Avenue to Sepulveda Blvd utilizing a partial US DOT Community Project Funding/Congressionally Directed Spending (CPFCDS) Project.
General Plan Element Goal(s): I-6 Create well-marked pedestrian and bicycle networks that facilitate these modes of circulation.

28th Street Stormwater Infiltration

Project Number: SW21402
Total Budgeted Capital Costs: \$19,859,506.00
Total Budgeted Funding Sources: \$19,859,506.00

Department: Storm Drain
Type: Storm Drain

Request description:

The project will divert dry and wet weather flows from an existing storm drain to a new pump station and then through a series of sedimentation chambers and into a gallery of infiltration wells.

Additional Information

Type of Project: Stormwater
Category: Carryover Project (Received previous appropriations)
Justification: The project is called for in the Beach Cities Enhanced Watershed Management Plan (EWMP) to reduce trash and bacteria discharges to Santa Monica Bay by capturing the stormwater from approximately 2/3rds of the City's land area. The project will also incorporate new pervious pavement and other improvements at the 26th Street Parking Facility.
General Plan Element Goal(s): I-9 Maintain a storm drainage system that adequately protects the health and safety and property of Manhattan Beach residents.

28th Street Stormwater Infiltration (CRNA)

Project Number: SW26014
Total Budgeted Capital Costs: \$4,936,566.00

Additional Information

Type of Project: Stormwater
Category: Carryover Project (Received previous appropriations)
Justification: The project is identified in the 2021 Storm Drain Master Plan to mitigate flooding conditions for a number of properties, increase capacity for storm drain laterals as well as improve emergency services and maintenance access.
General Plan Element Goal(s): I-9 Maintain a storm drainage system that adequately protects the health and safety and property of Manhattan Beach residents.

El Porto Water Infrastructure Improvements (Partial CPF)

Project Number: WA25006
Total Budgeted Capital Costs: \$9,100,000.00
Total Budgeted Funding Sources: \$9,100,000.00

Department: Water
Type: Water

Request description:

The project will construct a 12-inch pipeline parallel to the existing 8-inch pipeline along Rosecrans Ave from Sepulveda Blvd to Highland Ave, continuing on Highland Ave to 38th St., then to Crest Dr. and along Crest Dr. to 45th St.

Additional Information

Type of Project: Water
Category: New Project (Funding identified, not yet appropriated)
Justification: This project is one of the high priority projects identified in the 2021 Water Master Plan and would improve water quality and fire flow in the El Porto area.

General Plan Element Goal(s): I-7 Maintain and protect a reliable and cost effective water supply system capable of adequately meeting normal demand and emergency demand in the City.

Measure W Fund

28th Street Stormwater Infiltration

Total		\$0.00	\$0.00	\$0.00	\$410,000.00	\$1,520,000.00	\$1,930,000.00

Additional Information

Type of Project	Stormwater
Category	Carryover Project (Received previous appropriations)::New Project (Funding identified, not yet appropriated)
Justification	This project is one of the priority projects identified in the 2021 Storm Drain Master Plan. The project would improve the modeled 50 year and 100 year flooding conditions for multiple properties. Shelley Street and South Meadows have an existing sump capacity limitation that, during heavy rainfall, impacts school traffic due to overflow of the sump.
General Plan Element Goal(s)	I-7 Maintain and protect a reliable and cost effective water supply system capable of adequately meeting normal demand and emergency demand in the City.

Additional Information

Type of Project: Stormwater
 Category: Carryover Project (Received previous appropriations)
 Justification: Video inspection and analysis of the storm drain lines revealed structural and operational condition assessment Defect Codes of Grade 5 — Defect Requiring Immediate Attention. The methodologies for the Defect Code categories were established by the National Association of Sewer Service Companies Pipeline Assessment and Certification Program. Severity of Defect Codes increases from 1 to 5.
 General Plan Element Goal(s): I-9 Maintain a storm drainage system that adequately protects the health and safety and property of Manhattan Beach residents.

Beach Cities Green Streets Stormwater Infiltration

Project Number: SW21401
Total Budgeted Capital Costs: \$47,690.00
Total Budgeted Funding Sources: \$47,690.00

Department: Storm Drain
Type: Storm Drain

Request description:

In conjunction with Hermosa Beach, Redondo Beach, and Torrance, the City will construct a regional stormwater quality improvement project consisting of 13 proposed sites. The scope will include a variety of green street elements such as dry wells, trash capture devices, trees and plants in medians and parkways, permeable pavement, and bio-retention swales.

Capital Costs	Historical Budgeted	FY2027	FY2028	FY2029	FY2030	FY2031	Total Budgeted

Additional Information

Type of Project Stormwater
Category Carryover Project (Received previous appropriations)
Justification This regional project is identified in the Beach Cities Watershed Management Plan (WMP) to achieve stormwater quality objectives by treating dry-weather runoff to reduce pollution and provide aesthetic benefits. City Council approved the MOU for the design of the project on June 23, 2020, and a separate MOU for the construction on November 19, 2024.
General Plan Element Goal(s) I-9 Maintain a storm drainage system that adequately protects the health and safety and property of Manhattan Beach residents.

CCTV Storm Drain System

Project Number: SW20401
Total Budgeted Capital Costs: \$150,000.00
Total Budgeted Funding Sources: \$150,000.00

Department: Storm Drain
Type: Storm Drain

Request description:

Use CCTV to perform an assessment of the City's storm drain system.

Total	\$100,000.00	\$558,337.00	\$0.00	\$0.00	\$0.00	\$0.00	\$658,337.00

Additional Information

Type of Project: Stormwater
Category: Carryover Project (Received previous appropriations)
Justification: The current switch gear and motor control center at the lift station are outdated and require constant repairs and maintenance. They have reached the end of their useful life and need to be upgraded. In addition, the concrete pad and fencing will need to be demolished and restored. Rehabilitation of the wet well is also needed.
General Plan Element Goal(s): I-9 Maintain a storm drainage system that adequately protects the health and safety and property of Manhattan Beach residents.

Manhattan Beach Dominguez Channel Stormwater Infiltration - Feasibility Study

Project Number: SW24019
Total Budgeted Capital Costs: \$125,131.00
Total Budgeted Funding Sources: \$125,131.00

Department: Environmental Compliance – Storm
Type: Drain

Timeline: 05/21/2024 to 12/31/2026

Request description:

Feasibility study for a stormwater infiltration project within the Dominguez Channel watershed.

Total	\$681,687.00	\$0.00	\$0.00	\$0.00	\$0.00	\$0.00	\$681,687.00

Additional Information

Type of Project: Stormwater
Category: Carryover Project (Received previous appropriations)
Justification: The project is identified in the 2021 Storm Drain Master Plan to mitigate flooding conditions for a number of properties, increase capacity for storm drain laterals as well as improve emergency services and maintenance access.
General Plan Element Goal(s): I-9 Maintain a storm drainage system that adequately protects the health and safety and property of Manhattan Beach residents.

TMDL Trash Treatment

Project Number: SW24005
Total Budgeted Capital Costs: \$141,097.00
Total Budgeted Funding Sources: \$141,097.00

Department: Storm Drain
Type: Storm Drain

Request description:
 Citywide installation of trash capture devices in the storm drain system.

Total	\$16,097.00	\$125,000.00	\$0.00	\$0.00	\$0.00	\$0.00	\$141,097.00

Additional Information

Type of Project: Stormwater
 Category: Carryover Project (Received previous appropriations)
 Justification: To ensure compliance with the total maximum daily load (TMDL) requirements for trash in the storm system as determined by the Regional Water Quality Control Board.

General Plan Element Goal(s): I-9 Maintain a storm drainage system that adequately protects the health and safety and property of Manhattan Beach residents.; I-12 Protect the quality of the environment by managing the solid waste generated in the community.

Stormwater Capital Best Management Practices Program

Total Budgeted Capital Costs: \$840,000.00
Total Budgeted Funding Sources: \$840,000.00

Department: Storm Drain
Type: Storm Drain

Request description:

A Capital Improvement Program (CIP) to plan, design, and construct/install structural and non-structural methods or devices to manage and treat stormwater runoff.

Capital Costs	Historical Budgeted	FY2027	FY2028	FY2029	FY2030	FY2031	Total Budgeted
Planning/Design		\$0.00	\$0.00	\$100,000.00	\$100,000.00	\$100,000.00	\$400,000.00

Grants and Other Outside Funds							\$0.00
Total		\$0.00	\$0.00	\$210,000.00	\$210,000.00	\$210,000.00	\$840,000.00

Additional Information

Type of Project	Stormwater
Category	New Project (Funding identified, not yet appropriated)
Justification	The National Pollutant Discharge Elimination System (NPDES) permit was reissued in winter 2012. This permit includes Total Maximum Daily Load (TMDL) and water quality requirements. The Project will help plan, design, and construct/install structural and non-structural methods or devices to treat and improve stormwater runoff and water quality through out the City.
General Plan Element Goal(s)	I-9 Maintain a storm drainage system that adequately protects the health and safety and property of Manhattan Beach residents.; I-12 Protect the quality of the environment by managing the solid waste generated in the community.

Sewer Fund

Annual Rehabilitation of Gravity Sewer Mains

Project Number: WW17501
Total Budgeted Capital Costs: \$3,000,000.00
Total Budgeted Funding Sources: \$3,000,000.00

Department: Sewer
Type: Sewer

Request description:

Rehabilitation or replacement of gravity sewer mains annually throughout the City.

Capital Costs	Historical Budgeted	FY2027	FY2028	FY2029	FY2030	FY2031	Total Budgeted

Additional Information

Type of Project: Wastewater
 Category: Carryover Project (Received previous appropriations)
 Justification: The locations for rehabilitation or replacement have been identified by maintenance staff and through CCTV (Closed Circuit Television) inspection. It is critical to maintain the quality and dependability of the City's sewer infrastructure through a routine preventative maintenance process.
 General Plan Element Goal(s): I-8 Maintain a sewage system adequate to protect the health and safety of all Manhattan Beach residents and businesses.

Bell Lift Station Upgrade

Project Number: WW25004
Total Budgeted Capital Costs: \$665,000.00
Total Budgeted Funding Sources: \$665,000.00

Department: Sewer
Type: Sewer

Request description:

Bell Avenue Sewer Lift Station Upgrade Project involves constructing a new sizeable emergency storage wet well, replacing the existing station and appurtenances, and installing a new force main pipeline.

Capital Costs	Historical Budgeted	FY2027	FY2028	FY2029	FY2030	FY2031	Total Budgeted

Total	\$55,000.00	\$0.00	\$120,000.00	\$0.00	\$490,000.00	\$0.00	\$665,000.00

Additional Information

Type of Project Wastewater
Category Carryover Project (Received previous appropriations)
Justification The Sewer Master Plan identified the Bell Sewer Lift Station as needing to provide greater emergency storage capacities, increased pumping capacities, and other enhancements. The project will upgrade the station to provide a new adequate emergency storage wet well, new force main pipeline, and installation of new mechanical and electrical equipment for increased reliability.
General Plan Element Goal(s) I-8 Maintain a sewage system adequate to protect the health and safety of all Manhattan Beach residents and businesses.

Meadows Lift Station Upgrade

Project Number: WW25011
Total Budgeted Capital Costs: \$5,155,000.00
Total Budgeted Funding Sources: \$5,155,000.00

Additional Information

Type of Project: Wastewater
Category: New Project (Funding identified, not yet appropriated)
Justification: The Sewer Master Plan identified the Meadows Sewer Lift Station as needing to provide greater emergency storage capacities, increased pumping capacities, and other enhancements. The project will upgrade the station to provide a new adequate emergency storage wet well, a new dry vault structure, new force main pipeline, and installation of new mechanical and electrical equipment for increased reliability.
General Plan Element Goal(s): I-8 Maintain a sewage system adequate to protect the health and safety of all Manhattan Beach residents and businesses.

Pacific Lift Station Replacement (Gravity Sewer)

Project Number: WW19501
Total Budgeted Capital Costs: \$7,705,611.00
Total Budgeted Funding Sources: \$7,705,611.00

Department: Sewer
Type: Sewer

Request description:

Pacific Ave Sewer Lift Station conversion to sewer gravity line involves the demolition of the existing sewer lift station, installation of five new manholes, and approximately 900 feet of microtunneling to the Los Angeles County Sanitation District sewer trunk line connection at Pacific Ave and Ardmore Ave.

Capital Costs	Historical Budgeted	FY2027	FY2028	FY2029	FY2030	FY2031	Total Budgeted

Total	\$7,705,611.00	\$0.00	\$0.00	\$0.00	\$0.00	\$0.00	\$7,705,611.00

Additional Information

Type of Project: Wastewater
Category: Carryover Project (Received previous appropriations)
Justification: The Sewer Master Plan identified the Pacific Ave Sewer Lift Station as requiring significant rehabilitation, including increased emergency storage. Due to the topography of the City and the invert elevations of nearby Los Angeles County sanitary sewer infrastructure, conveying the wastewater flow by gravity is feasible and will be implemented to eliminate the requirement for the complete rehabilitation of the sewer lift station. Constructing a gravity pipeline and eliminating the existing sewer lift station will save on maintenance and capital costs over time.

General Plan Element Goal(s): I-8 Maintain a sewage system adequate to protect the health and safety of all Manhattan Beach residents and businesses.

Palm Lift Station Upgrade

Project Number: WW25012
Total Budgeted Capital Costs: \$475,000.00
Total Budgeted Funding Sources: \$475,000.00

Department: Sewer
Type: Sewer

Request description:

Palm Ave Sewer Lift Station Upgrade Project involves constructing a new sizeable emergency storage wet well, replacing the existing station and appurtenances, and installing a new force main pipeline.

Additional Information

Type of Project Wastewater
Category Carryover Project (Received previous appropriations)
Justification The Sewer Master Plan identified the Voorhees Sewer Lift Station as needing to provide greater emergency storage capacities, increased pumping capacities, and other enhancements. The project will upgrade the station to provide a new adequate emergency storage wet well, reintegration of the existing station's dry vault structure, and installation of new mechanical and electrical equipment for increased reliability. Additionally, to improve system redundancy, a second force main pipeline will be installed and the existing force main pipeline will be rehabilitated.

General Plan Element Goal(s) I-8 Maintain a sewage system adequate to protect the health and safety of all Manhattan Beach residents and businesses.

Sewer Master Plan Update

Total Budgeted Capital Costs: \$1,600,000.00
Total Budgeted Funding Sources: \$1,600,000.00

Department: Sewer
Type: Sewer

Request description:

Last updated in 2010, the Sewer Master Plan is a guidance document for infrastructure and operations, the system capacity, and hydraulic assessment citywide. The effort to include CCTV of the city's sewer gravity lines.

Additional Information

Type of Project Water

Category Carryover Project (Received previous appropriations)

Justification Presently, the Larsson Street Booster Station consists of three electric pumps with variable speed drives. At times, all three pumps are called to provide peak domestic service and on occasion, the 2nd Street Booster Station is also called to assist. Optimally, peak domestic service should be served by two of the three pumps at the station. This would allow one of the pumps to be taken out of service for maintenance without requiring the 2nd Street Booster Station to be called. The Larsson project will provide three new pumps at the station such that two pumps should handle peak domestic service. Three new pumps and variable speed drives will be installed along with new motor controls, control valves, relief valve, piping, and wiring.

General Plan Element Goal(s) I-7 Maintain and protect a reliable and cost effective water supply system capable of adequately meeting normal demand and emergency demand in the City.

Annual Groundwater Wells Capital Maintenance Program

Project Number: WA25001
Total Budgeted Capital Costs: \$591,554.00
Total Budgeted Funding Sources: \$591,554.00

Department: Water
Type: Water

Request description:

Rehabilitation, including upgraded electronics, and annual maintenance of the City's two groundwater wells located in the City of Redondo Beach.

Additional Information

Type of Project: Water
Category: Carryover Project (Received previous appropriations)
Justification: Presently, the Larsson Street Booster Station consists of three electric pumps with variable speed drives. At times, all three pumps are called to provide peak domestic service and on occasion, the 2nd Street Booster Station is also called to assist. Optimally, peak domestic service should be served by two of the three pumps at the station. This would allow one of the pumps to be taken out of service for maintenance without requiring the 2nd Street Booster Station to be called. The Larsson project will provide three new pumps at the station such that two pumps should handle peak domestic service. Three new pumps and variable speed drives will be installed along with new motor controls, control valves, relief valve, piping, and wiring.

General Plan Element Goal(s): I-7 Maintain and protect a reliable and cost effective water supply system capable of adequately meeting normal demand and emergency demand in the City.

Recycled Water Feasibility Study for MBB Medians and Highland Avenue Tree Wells

Project Number: WA26010
Total Budgeted Capital Costs: \$60,000.00
Total Budgeted Funding Sources: \$60,000.00

Department: Water
Type: Water

Request description:

Complete a feasibility study on expanding recycled water (i.e. purple pipe) capacity from Polliwog Park to the medians on Manhattan Beach Boulevard and turf replacement in the medians. Additionally, to accommodate planted and tree areas on Highland Avenue, the study will look at extending recycled water from Sand Dune Park to Highland Avenue.

Additional Information

Type of Project	Water
Category	Carryover Project (Received previous appropriations)
Justification	In response to California's persistent drought conditions, the City Council declared a Stage 2 Water Shortage in June 2022 and imposed drought restrictions in accordance with the emergency water conservation regulations enacted by the State Water Resources Control Board. Under the Council's declaration, and in conformance with state regulations, commercial, industrial, and institutional sites are prohibited from watering "non-functional turf" (e.g., grass that is ornamental and not used for recreation and community events) with potable water. The medians along Manhattan Beach Boulevard are the only medians that are supplied with potable water. Additionally, for water conservations efforts, the project proposes to replace the turf with drought-tolerant landscaping as approved by City Council on October 17, 2023. Highland Avenue tree wells in North Manhattan Beach are currently hand-watered.
General Plan Element Goal(s)	CR-4 Preserve the existing landscape resources in the City, and encourage the provision of additional landscaping.; LU-9 Preserve the low-intensity, pedestrian-oriented character of commercial areas in the North End and El Porto.

Water Master Plan Hydraulic Model Update

Project Number: WA25018
Total Budgeted Capital Costs: \$200,000.00
Total Budgeted Funding Sources: \$200,000.00

Department: Water
Type: Water

Request description:

Update the Water Master Plan hydraulic model to calibrate to current water infrastructure improvements, including the Peck Reservoir.

Additional Information

Type of Project: Water
Category: New Project (Funding identified, not yet appropriated)
Justification: A computer model was developed of the City's water system during the 2021 Water Master Plan Update, while Peck Reservoir was under construction and offline. The model needs to be updated with Peck Reservoir back in service.

General Plan Element Goal(s): I-7 Maintain and protect a reliable and cost effective water supply system capable of adequately meeting normal demand and emergency demand in the City.

Block 35 Elevated Tank Improvements

Total Budgeted Capital Costs: \$175,000.00
Total Budgeted Funding Sources: \$175,000.00

Department: Water
Type: Water

Request description:

The project includes reinstallation of the communication antenna at the Block 35 Elevated Tank and installation of cathodic protection on the intake pipe.

Capital Costs	Historical Budgeted	FY2027	FY2028	FY2029	FY2030	FY2031	Total Budgeted

Total		\$0.00	\$175,000.00	\$0.00	\$0.00	\$0.00	\$175,000.00

Additional Information

Type of Project	Water
Category	Carryover Project (Received previous appropriations)::New Project (Funding identified, not yet appropriated)
Justification	The Block 35 Elevated Tank was repainted in 2021 due to showing signs of severe rusting and paint deterioration. In order to preserve the tank's steel structure, it is imperative that the exterior and interior surfaces be repainted and epoxied in order to keep metal corrosion under control. Miscellaneous structural repairs were identified during repainting that need to be addressed, along with reinstallation of the communication antenna on the top of the tower. It is also required to install cathodic protection on the intake pipe to prevent corrosion.
General Plan Element Goal(s)	I-7 Maintain and protect a reliable and cost effective water supply system capable of adequately meeting normal demand and emergency demand in the City.

Block 35 Ground Level Reservoir Replacement

Total Budgeted Capital Costs: \$1,000,000.00
Total Budgeted Funding Sources: \$1,000,000.00

Department: Water
Type: Water

Request description:

Design of a potential new, larger capacity water reservoir at Block 35.

Total		\$0.00	\$0.00	\$0.00	\$0.00	\$0.00	\$1,000,000.00

Additional Information

Type of Project	Water
Category	Carryover Project (Received previous appropriations);:New Project (Funding identified, not yet appropriated)
Justification	Block 35 Ground Level Reservoir (2 million-gallons) was originally constructed in 1948. Due to leakage at the wall/floor joint at high water levels, the reservoir is operated at half full level. This is the facility where most of the blending takes place, and from where water is pumped into the system. Therefore, its integrity is essential for proper operation of the water system. It is at the end of its useful life, and should be replaced with a new, larger reservoir. The appropriate size of the new water reservoir will be determined during the planning phase of design.
General Plan Element Goal(s)	I-7 Maintain and protect a reliable and cost effective water supply system capable of adequately meeting normal demand and emergency demand in the City.

Groundwater Well 15 Site Improvements

Total Budgeted Capital Costs: \$1,850,000.00
Total Budgeted Funding Sources: \$1,850,000.00

Department: Water
Type: Water

Request description:

Design and construct the upgraded electrical elements and site improvements at the Groundwater Well 15 site.
