

**Table 4
Structural BMP Project Implementation Timeline**

Santa Monica Bay Watershed	2018	2020	2022	2023	2026	2032
Hermosa Beach Infiltration Trench						
Manhattan Beach Infiltration Trench (Shoreline)						
Catch Basin Retrofits						
Polliwog Park Infiltration Gallery						
Green Streets Application in SMB 5-02, Alternative						
Hermosa Beach Greenbelt Infiltration						
Park #3						
Green Streets Application in SMB 6-01						
Dominguez Channel Watershed						
Powerline Easement						
Artesia Infiltration						
Green Streets Application in non-Torrance Areas						
Machado Lake Watershed and Torrance						
Catch Basin Inserts within Torrance						
Wilson Park Infiltration Basin						
McMaster Park Infiltration Basin						
El Prado Infiltration Basin						

Interim Target: 50% Wet Weather Bacteria Reduction by 2018

20% Annual Trash Load Reduction Per Year - 2016 thru 2020

Final Target - Santa Monica Bay: 100% Wet Weather Bacteria Reduction by 2021

Final Target - Dominguez Hills: 100% Dry and Wet Weather Bacteria Reduction by 2021

Final Target: Toxicity, Copper, Lead, Zinc by 2032
