EXHIBIT A SCOPE OF SERVICES

Understanding the Scope of Services

IDS is an architectural and engineering consulting firm offering comprehensive design services specializing in capital improvement projects.

Polliwog Park Fitness Station Project

IDS prepared a 10-page Civil Engineering Plan set for the Mariposa Fitness Center, dated February 24, 2020. The fitness station is located in the Veteran's Parkway, south of City Parking Lot No. 7 adjacent to the intersection of Valley Drive and 10th Place. Budgetary constraints prevent installation of fitness equipment at the original Mariposa site. IDS understands the City of Manhattan Beach would like to modify the engineering drawings to accommodate installation of equipment at Polliwog Park (at the northeast corner of North Peck Avenue and Manhattan Beach Boulevard), approximately two miles from the original site.

Polliwog Park Fitness Center Scope of Work

A canopy covers the existing Fitness Center equipment, adjacent to North Redondo Avenue at the Polliwog Park site. The fitness Area is accessible from a sidewalk on the east side of the facility and is bounded by a concrete curb and three-foot high temporary fence.

Anticipated construction work includes:

- Removal and disposal of fitness equipment and rubber mulch
- Protect-in-place existing curb in place on north, east, and south sides
- Protect-in-place existing canopy structure
- Construct nominal 34x37 concrete pad to anchor fitness center equipment
- Remove and replace noncompliant ADA sidewalk immediately adjacent to fitness center
- Remove and replace noncompliant ADA sidewalk, approximately 5,000 square feet of area north of fitness center. See Exhibits A and B provided by City of Manhattan Beach, attached hereto.

 - IDS will submit all deliverables in electronic PDF and AutoCAD file Formats. The plans will be in AutoCAD Version and the balance of the construction documents shall be in Microsoft Word and/or in Excel.

Assumptions and Exclusions:

- A soils report was not provided for this project and is not anticipated.
- The project does not increase imperviousness of the site for an area equal to or greater than 5,000 square feet and therefore does not trigger LID or WQMP.
- IDS Survey work for the site will supplement the survey base file provided by the City of Manhattan Beach, which IDS assumes is agreeable to City Plan Check requirements.
