

RESOLUTION NO 22-0145

RESOLUTION OF THE CITY OF MANHATTAN BEACH CITY COUNCIL MAKING EXPRESS FINDINGS AND DETERMINATIONS THAT MODIFICATIONS TO THE 2022 CALIFORNIA FIRE CODE ARE REASONABLY NECESSARY BECAUSE OF LOCAL CLIMATIC, GEOLOGICAL OR TOPOGRAPHICAL CONDITIONS

THE MANHATTAN BEACH CITY COUNCIL HEREBY FINDS AND RESOLVES AS FOLLOWS:

SECTION 1. Certain model and uniform codes, including the 2022 California Fire Code located within Title 24 of the California Code of Regulations and including building standards therein, are adopted and amended by the State of California in the 2022 California Building Standards Code. On January 1, 2023, the 2022 California Building Standards Code will become applicable in the City, subject to amendments made by the City pursuant to state law.

SECTION 2. Health and Safety Code Sections 17958.5 and 18941.5 permit local amendments to building standards adopted by the State, based upon express findings that such amendments are reasonably necessary due to local climatic, geological and/or topographical conditions. These amendments must be expressly marked and identified as to which each finding refers. Local amendments must be more restrictive than the building standards adopted by the State.

SECTION 3. The City Council finds that certain local climatic, geological, or topographical conditions exist as follows:

A. Climatic. The City experiences periods of extremely high temperatures accompanied by low humidity and high winds each year. These conditions could create an environment in which the Fire Department may be unable to control fires occurring in vegetation as well as structures not having built-in fire protection.

B. Geological. The City is located in a seismically active area. A significant earthquake could render the Fire Department incapable of providing adequate fire protection. In that instance, built-in fire protection would be relied upon for controlling most structural fires.

C Topographical. The City is located in a densely populated coastal area in Los Angeles County that is more prone to high winds, earthquakes and fire, making it more difficult of Fire personnel to access than many other areas in California.

SECTION 4. After due consideration, the City Council finds and determines that due to these local climatic, geological and topographical conditions, that amendments, additions and deletions to the 2022 California Building Standards Code are reasonably necessary to provide sufficient and effective levels of safety for the protection of life,

health and property. The following table shows more specifically, which conditions require and justify each amendment:
