Investment Objectives and Constraints

The goal of the Plan's investment program is to generate adequate long-term returns that, when combined with contributions, will result in sufficient assets to pay the present and future obligations of the Plan. The following objectives are intended to assist in achieving this goal:

- The Plan should seek to earn a return in excess of its policy benchmark over the life of the Plan.
- The Plan's assets will be managed on a total return basis which takes into consideration both investment income and capital appreciation. While the Plan Sponsor recognizes the importance of preservation of capital, it also adheres to the principle that varying degrees of investment risk are generally rewarded with compensating returns. To achieve these objectives, the Plan Sponsor allocates its assets (asset allocation) with a strategic perspective of the capital markets.

Investment Time Horizon: Long Term

Anticipated Cash Flows: Assets in the Plan will seek to mitigate the impact of future rate increases from CALPERS. Typically increases in rates come with a one-year advance warning, however this Plan may transfer assets to CALPERS at any time.

Investment Objective: The primary objective is to generate a reasonable level of growth. The assets in this Plan will eventually be used to fund Pension Plan obligations for assets managed in the CALPERS Trust.

Risk Tolerance: Moderate
The account's risk tolerance has been rated moderate, which demonstrates that the account can accept price fluctuations to pursue its investment objectives.

Strategic Asset Allocation: The asset allocation ranges for this objective are listed below:

<i>Strategic Asset Allocation Ranges</i>		
Cash	Fixed Income	Equity
0-20%	40%-60%	40%-60%
