Any dispute arising out of or in connection with the Agreement, including any question regarding its existence, validity or termination, will be resolved in accordance with this Section and will be settled, if possible, by negotiation of the Parties. Either Party may, by giving written notice, refer the dispute to a meeting of appropriate representatives of each Party, to be held within twenty (20) business days after giving notice. If the dispute is not resolved within thirty (30) business days after the date of the meeting of the Parties, or any later date to which the Parties may agree, either Party may submit the dispute to any mutually agreed mediation service for mediation by providing to the mediation service a joint, written request for mediation, setting forth the subject of the dispute and the relief requested. The parties shall cooperate with the mediation service and with one another in selecting a neutral mediator and in scheduling the mediation proceedings. The parties covenant that they will use commercially reasonable efforts in participating in the mediation. The parties agree that the mediator's fees and expenses and the costs incidental to the mediation will be shared equally between the parties.

These dispute resolution procedures are not intended to be used for disputes concerning actual, alleged or threatened breaches of a Party's confidentiality obligations or infringement of a Party's Intellectual Property Rights where the remedy being sought is injunctive or other equitable relief, and the Parties may immediately bring an action therefore seeking injunctive or other equitable relief. Any claims seeking monetary damages shall be disputed by arbitration as provided below, provided that such arbitration shall not preclude a Party's right to bring an action for injunctive or other equitable relief for breach of the confidentiality obligations or infringement of intellectual property rights, whether brought contemporaneously or otherwise.

In the event that the Parties are unable to resolve a dispute through mediation, then all disputes arising out of or in connection with this Agreement, which shall include, but are not limited to, all contracts entered into between the Parties, or the validity, enforceability or scope of this arbitration provision, shall be finally settled under the Rules of Arbitration of the American Arbitration Association by three arbitrators appointed in accordance with said Rules. Such arbitrators shall each have not less than 10 years' experience in arbitration of commercial contracting disputes. The place of arbitration shall be Los Angeles, California. The Parties agree that the United States Federal Arbitration Act shall govern the interpretation, enforcement, and proceedings pursuant to the arbitration clause in this agreement. The arbitration shall

be conducted in the English language. The arbitrators shall award to the prevailing party, if any, as determined by the arbitrators, all of its costs and fees. "Costs and fees" mean all reasonable pre-award expenses of the arbitration, including the arbitrators' fees, administrative expenses, travel expenses, out of pocket expenses such as copying and telephone, court costs, witness fees, and attorney's fees.

N. **Severability.** If any term or provision of this Agreement is invalid, illegal or unenforceable in any jurisdiction, such invalidity, illegality or unenforceability shall not affect any other term or provision of this Agreement or invalidate or render unenforceable such term or provision in any other jurisdiction. Upon such determination that any term or other provision is invalid, illegal or unenforceable, the parties hereto shall negotiate in good faith to modify this Agreement so as to effect the original intent of the parties as closely as possible in a mutually acceptable manner in order that the transactions contemplated hereby be consummated as originally contemplated to the greatest extent possible.

EXHIBIT A

Technical Support

Master Meter Technical Services provides utility customers with Tier 1 support of technical issues as well as any coordination of additional resources required to resolve the issue. Requests that require specialized skills will be forwarded through the Systems Technical Support team for further analysis. If Systems Technical Support has exhausted their level of support for the product type, they will escalate to the next level of support. Occasionally, on-site troubleshooting / analysis may be required. The preferred order of on-site support is:

- A. The Customer (for assistance with the easiest and lowest time-consuming activities such as power on / power off).
- B. The local distributor (where applicable).
- C. Master Meter Inc., Systems Technical Support or contracted personnel, where required to fulfill a contract commitment.

1. Support Categories

- 1.1. General questions regarding functionality, use of product, how-to, and requests for assistance on Master Meter AMR/AMI Network Equipment, and Metering Products.
- 1.2. Proactive reporting and resolution of problems.
- 1.3. Reactive reporting to isolate, document, and solve reported hardware/software defects.
- 1.4. Responding to service requests and product changes.
- 1.5. Addressing customer inquiries with printed or electronic documentation, examples, or additional explanation/clarification.

2. Support Hours

Standard Support Hours: Toll-free telephone support 1-800-928-6388 is available Monday thru Friday from 7:00AM CST to 5:00PM CST.

3. Support Procedures

- 3.1. Customer identifies an issue or potential problem and calls System Technical Support at **1-800-928-6388**. The Systems Technical Support Associate will work to resolve the issue making notes in the Customer Relationship Management Software (CRM).
- 3.2. Systems Technical Support will identify the caller by requesting their name, utility name and state. The nature of the problem and severity will be agreed upon by both parties (either at the time the issue is managed or prior to upgrading or downgrading an existing issue) using the definitions below as a guideline. The issue is then captured into the CRM Software for resolution tracking.

D. Severity Levels Description:

Severity 1 - Customer's system is down. The system is unusable resulting in total disruption of work. No workaround is available and requires immediate attention. (Example: Network mass outage, all reading collection devices inoperable, inoperable head end software (e.g., Master Meter MDM)).

Severity 2 - Major system feature/function failure. Operations are severely restricted; there is a major disruption of work, no acceptable work-around is available, and failure requires immediate attention. (Examples: Network equipment failure, head end software application has important functionality not working and cannot create export file for billing system operations.)

Severity 3 - The system is usable and the issue doesn't affect critical overall operation. (Example: Minor network equipment failure; head end software application operable but reports are not running properly, modification of view or some non-critical function of the software is not running.)

Severity 4 - Minor system issues, questions, new features, or enhancement requests to be corrected in future versions. (Examples: Minor system issues, general questions, and "How-To" questions.)

- 3.3. Systems Technical Support identifies whether or not the customer is on support. If the customer is not on support, the customer is advised of the service options and passed to accounting who will advise of any applicable charges that are required prior to continued support.
- 3.4. Calls are managed through Systems Technical Support on a first-come-first-serve basis. Level 1 Systems Technical Support will initially assist the customer and will typically respond/resolve the majority of calls based on their product knowledge and experience. A call history for the particular account is researched to note any existing pattern or if the call is a new instance. This research provides the representative a basis and understanding of the account as well as any associated problems and/or resolutions that have been communicated.
 - a. Systems Technical Support may confirm that there is an issue or problem that needs further analysis to determine its cause. The following information is collected: a detailed description of the issue's symptoms, details on the software/hardware product and version, a description of the environment in which the issue arises, and a list of any corrective action already taken.
 - b. Systems Technical Support may then check the CRM, to see if reports of a similar problem exist, and if any working solutions were provided. If an existing resolution is found that will address the reported issue, it shall be communicated to the customer. If confirmed that the issue has been resolved, the event is closed.
 - c. If there is no known defect or support that defines the behavior, Systems Technical Support will work with the customer to reproduce the issue. If the issue can be reproduced, Systems Technical Support will escalate the issue for further investigation / resolution.

If the issue involves units that are considered to be defective with no known reason, Systems Technical Support or AMR/AMI will direct the customer to the RMA team, or they may request an

RMA directly. If it is determined that a sample is required for further analysis, the customer will be provided with instructions that detail where to send the RMA sample(s) for further investigation. Once it is determined that the issue cannot be resolved by Tier 1 resources, the event will be escalated to Tier 2 support for confirmation/workarounds to resolve immediate issue. The RMA team will keep the customer and the Systems Technical Support advised should escalation be required. The response and escalation times are listed in Section 5.
