1. Proposed Use Permit and Adoption of a Mitigated Negative Declaration (MND) and Mitigation Monitoring and Reporting Program (MMRP) for the Peck Reservoir Replacement Project (City of Manhattan Beach - Public Works Department)

The entire existing reservoir and other site improvements are proposed to be demolished to make way for the new reservoir and water treatment facilities. The proposed replacement reservoir will be sited in approximately the same footprint as the existing reservoir. Additional new facilities will include an operations building, electrical control and pump station building, standby generators, water treatment facilities, stormwater infiltration drywell, utility pipelines replacement on 18th and 19th Street and Herrin Avenue, fencing, landscaping, lighting, sidewalk improvements and security systems. As a Major Utility in the Public and Semi-Public Zone, a Use Permit is required. A Mitigated Negative Declaration in accordance with the California Environmental Quality Act was also prepared.

After the Planning Commission takes action on this item the next steps include completion of the design for the project and plan check submittal. After plan check approval, Public Works will take the project to City Council for approval of the final design, construction bidding and to appropriate the funding for construction.
